

Age of Tree

1. Measure girth (circumference) of the tree at shoulder height (cm).
2. Identify which tree species it is.
3. Use the table below to work out how old your tree is.

Girth (cm)	Age for tree:				
	Oak	Hazel, Elm, Ash, Beech, Birch, Willow, Cherry	Sycamore	Pine, Spruce	Holly, Yew,
20	10	8	7	6	16
40	20	16	15	12	32
60	30	24	22	18	48
80	40	32	29	25	64
100	50	40	36	31	80
120	60	48	44	37	96
140	70	56	51	43	112
160	80	64	58	49	128
180	90	72	65	55	144
200	100	80	73	62	160
220	110	88	80	68	176
240	120	96	87	74	192
260	130	104	95	80	208
280	140	112	102	86	224
300	150	120	109	92	240
320	160	128	116	98	256
340	170	136	124	105	272
360	180	144	131	111	288
380	190	152	138	117	304
400	200	160	145	123	320
450	225	180	164	138	360
