

Quarterly Progress Report

October – December 2021
Year 4 Quarter 3

The Environment

Restoring Traditional Boundaries

We are now in our final hedgelaying and planting season and we have been busy! A very successful two-day training course was held during the weekend of 13/14 November, with 16 participants on day 1 and 18 on day 2 (which included the farmer). All the participants were beginners and they made excellent progress laying 176 metres of young mixed hedge running up the hillside at Overhouses Farm near Barley. Two experienced trainers, Joe Craig and David Whitaker from the National Hedgelaying Society provided expert tuition. Due to continued interest and demand from the public, we will hold a second course in February.

Volunteers learning the art of hedge laying at Overhouses, Barley

A key capital restoration project at High Whitaker Farm this quarter has seen the completion of over 800m of new hedge line creation. These 3 hedges will provide excellent shelter for stock and wildlife as well as soaking up carbon and reducing overland flow and soil erosion. The two contractors (fencing and planting) so impressed the farmer that he is now keen to create several other new hedges on his property.

Two of the newly fenced, banked and planted hedgerows at High Whitaker Farm

Restoring Wildlife and Priority Habitats

This project has now completed, however, our volunteers have continued to carry out scrub clearance works at Worsaw Hill on two occasions this quarter.

Creating and Managing Woodlands

This quarter has been largely focussing on lining up all of projects for completion before March 2022. The Rivers Trust have been finalising project details with landowners and consultees and are just awaiting the allocation of funding for the final two projects.

Fencing is complete at Morans Farm and we are awaiting the delivery of trees to start tree planting in the new year.

We have submitted EWCO applications for two further sites which are awaiting finalisation from the Forestry Commission.

We have completed maintenance at Whin House Farm including the removal of tree shelters and some understorey planting at a copse on the farm.

We have also identified two further sites along Swanside Beck and we are awaiting the land owner to complete some pre works activity before that can be planted.

Woodland management works at Ogden plantation have also recommenced this quarter, carried out by the LP Volunteer group.

Restoring Footpaths and Repairing Peatland on the Summit

This project is completed, although works have continued under the Access for All project (see below).

The Economy

Enhancing Visitor Gateways and key routes to Access Heritage

Spring Wood Visitor Centre

Discussions around the proposed building improvements at Spring Wood are ongoing. LCC Assets have now produced a report to go to an internal Capital Board to ask for the additional funds needed to carry out the work. We should know by early February if this has been secured and if the project looks likely ahead within our timescale.

If the LCC funds or further approvals are not likely to be secured in time we will continue exploring other options for access projects that we can deliver in the remaining time of the LP. There are some projects which were suggested at the start of the project which we will revisit, and we are also re-examining the Heys Lane proposal with some support from Barley parish council.

Sabden Churn Clough Tramper Trail

We have had a very successful meeting at Sabden with St Nicholas' Church who have agreed to allow us to use a space for storage of the tramper and will help to do inductions and manage the bookings for people wishing to use it. Our new graduate trainee is assisting with this part of the project, he is currently looking at local suppliers for the ground works needed at the church in order to make it accessible for the tramper.

The tramper trail legal agreement is currently between LCC legal services and the land agents, so once this has been agreed we can then promote the trail.

Pendle Hill Summit Resilience work

Resilience work is nearing completion for this final phase of the project on Pendle Hill. A new stone lined ditch is being carefully created by CPY Excavations to manage water currently draining along the cart track. This will prevent both any further washing out of the subsoil and stop water damage to the dry stone walls next to the track. CPY will also do some further work on the new flag path to allow water and people to cross it.

Field and Fell have just installed a new gate near Ogden, and stoned-up the gateway together with some drainage work which will prevent flooding on this stretch of path which is part of the Pendle Way. In addition, repairs have been carried out to the adjacent dry stone wall boundary.

Terrafirma have installed some geotextile on the bare ground next to the new stretch of flagged path at the start of the route to the summit of Pendle Hill. In the spring this should allow a rough grass seed mixture to take hold and reduce further water damage. Our new graduate trainee is working on some interpretation signs to encourage people to walk on the stone path and not the textile, images to follow in the next report.

The new gateway at Ogden, before and after works

Nick o' Pendle

We have just ordered new stone waymarkers for the Nick of Pendle area which will be installed in the spring. We are also working on a new 'Earth Cache' for the area, creating an exciting resource which will help people find out more about the geology of this part of the hill. This will link with digital geocaches as well as a new information board to be produced for the official car park on the hill, close to Sabden village.

Offering Apprenticeships

As we near the end of the scheme, we are now down to 4 apprentices in post with us, including our newly recruited graduate trainee at the LP team: Christian.

Jenna from the Pendle Heritage Trust completed her apprenticeship this quarter and we are hoping that Emma will return there from her maternity leave in the Spring.

Calum, at In-Situ, reflected on his first year as their graduate trainee: *Over the past year, I have had the opportunity to try a real breadth of work and this is something I am very grateful for. Now that I have established key interests, found my strengths and weaknesses, I look forward to entering the second year of the traineeship with more confidence.*

The first season of our 'Working out of the Ordinary' films has gone down incredibly well with schools and careers advisers. Laura, Careers Adviser at All Saints High School said: *"The videos produced as part of your project have been so inspiring and particularly at this school where we have a lot of young people from farming families who want careers working outdoors. We still want to try and encourage them to get further qualifications, and I think you've gone a long way to demonstrate that even with barriers such as dyslexia that so much can be achieved when pursuing something you love."*

We have also identified a further four people to star in season 2 of our career films, which starts filming in January and will launch these as part of National Careers Week in March.

<https://lancashirecareershubs.co.uk/pendle-hill-landscape-partnership-new-career-guide-aims-to-inspire-lancashire-students/>

Sense of Place and Sustainable Tourism

Stuart Marshall of **Treasure Trails** has been working with children from two primary schools in Chatburn and Padiham to develop two new treasure trails, with support from Alison our Outdoor Learning Officer. The trails are printed quiz leaflets following a route of heritage sites to reach the 'buried treasure'. They will go on sale locally, and additional funds raised through local advertising and the sales go to the AONB charity, Champion Bowland, to fund future re-prints of the leaflets. The new trails will be launched in the spring, working with the schools involved.

Two new businesses have signed up to the Sustainable Tourism Network – Rimington Caravan Park and Hamish's Café and both are keen to link with the wider tourism opportunities offered through the AONB network. Hamish's are also cooking their own version of Pendle Peat Pie!

Children from Chatburn Primary school exploring their local heritage whilst developing the village Treasure Trail

Commissioning Research into the value the landscape offers to the economy and community services

This project is now closed, although an extension of the 72 Seasons project will run as part of the PEN project this spring and summer.

Everyone

Running a Community Grant Scheme

Year 2 grants:

- Clitheroe Young Farmers were finally able to hold their presentation evening for the Traditional Boundaries project they delivered, so that project is now completed.

Year 3 grants:

- Due to various delays caused by Covid and other things, the Calico and Clogs project (led by Sabden Parish Council) has been provided with an extension until 31st March 2022.
- Similarly, although the project led by Heritage Trust NW at Pendle Heritage Centre has made great progress, due to seasonality of the work and various delays this project has been provided with an extension until 31st March 2022, and possibly further into the summer.

Year 4 grants:

- Ride Pendle – Breaking Cycles CIC has got underway with the initial research aspect of this project and has made gains to attempt to alter existing popular off-road cycling routes, which illegally run on public footpaths, on Open Source mapping.
- Burnley Youth Theatre – due to the constraints of term times and the effects of Covid, the schools involved in this project have requested that this project take place in the summer term.

Providing Supported Activity Sessions for people dealing with mental health issues and social isolation

PEN sessions have continued throughout the 2021 winter season.

Monday afternoon walks have continued to be popular and well attended, with only an occasional week off. Walks have been spread across the LP and surrounding areas, introducing some of the participants to new places and walks.

Activity sessions have taken place every other week since the end of October. Usually, we deliver only 4 or 5 sessions throughout the whole winter period however, because of the effects of Covid, we were keen to provide as many opportunities as possible whilst also dealing with winter weather conditions.

Some of the winter sessions have been seasonal, including an enjoyable wreath making and wooden reindeer making session to celebrate Christmas. We also worked with Stacey, an outdoor counsellor, to deliver a mindfulness and forest bathing session, which was incredibly well received by the participants.

Christmas wreaths made by PEN participants (left), and the group enjoying a walk around Wycoller

The minibus pick-up service continues to be under-utilised compared to pre-covid however, we know there will be individuals who will wish to use this transport service in the new year and so hopefully we will be able to keep our partnership going with Little Green Bus.

Nick Alderson now manages Open Door, a charity in Colne that supports people in a number of different ways. His support for the PEN project has been limited over the past few months as he finds his feet in his new role, however we hope that awareness and advertising of PEN can grow in the New Year for people that access the other services that Open Door offers.

LSCFT CPET (the NHS mental health trust) service continues to offer support to PEN, and hopefully this will also grow in the future.

A facilitator for the extension work to the 72 Seasons project has been recruited. Farrah Imtiaz is an experienced community worker from the south Asian community in Pendle. She will run courses connecting people with nature through the spring/summer period and help evaluate the impact this has on health and wellbeing with support from Kirsty at The Evaluator, and Chris, our trainee.

Creatively Engaging People in our Radical History

This has been a very productive and exciting quarter for Pendle Radicals, with two major pieces of work being delivered, but work also continuing on a number of different strands of the project, much of it driven by our brilliant volunteer contributors.

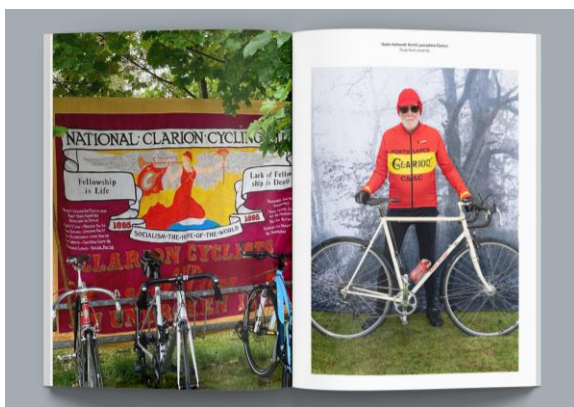

The most substantial item was the collaboration we were invited to contribute to the second **British Textile Biennial**. Our exhibition featured the Lancaster-based textile artist **James Fox**, whose work explored a number of themes of radicalism linked to the Lancashire textile industry, and included a homage to the Clarion movement and cycling culture. His spectacular body of work occupied three floors at Helmsshore Mills Textile Museum with some work also presented at Clarion House. It included a stunning film collaboration with actor Maxine Peake, and gave us further TV coverage on BBC1 NW Tonight, as well as in some regional print media and online. Feedback was terrific, and the exhibition attracted 2,710. Pupils at Marsden Community College in Brierfield worked with James to create an installation for the exhibition.

British Textile Biennial exhibits from Marsden Heights students (left) and James Fox (right) on the theme of Radicals

In December we published the limited edition publication **I Am Clarion**, created from **Alan Ward**'s project for Clarion Sunday, the annual pilgrimage that took place in September. Over 100 cyclists visiting Clarion House from Clarion clubs across the north of England were photographed by Alan, who also collected electronic data about their various routes to Newchurch on the day.

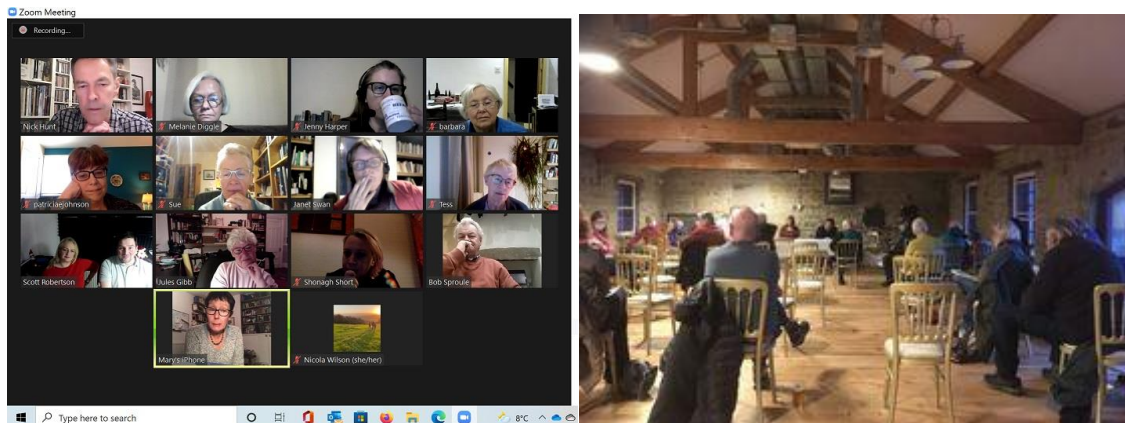

The publication was intended primarily for the participants it featured, but we were so delighted with the finished artefact that we ordered an additional stock. Copies are being circulated to Radicals volunteers and stakeholders, with a few more available for purchase. We have received some wonderful feedback from some of the recipients.

Two double page spreads from the 'I Am Clarion' book

In December we also brought together a Zoom session of Radicals volunteers and academics working through various initiatives to promote the work of mill girl turned celebrity writer **Ethel Carnie Holdsworth**. We used this session to introduce Jenny Harper, PhD candidate undertaking the collaborative doctorate on the work of Ethel that we are jointly hosting with Reading and Exeter Universities.

We heard too from our **podcast team**, inspired by the experience of the first series, who are now well advanced on a second series exploring the Ethel Carnie novel 'Miss Nobody'. LCC Libraries have just confirmed their partnership on this second series. The Zoom sharing session also touched on the group introduction that Pendle Radicals volunteers will be contributing for the next novel re-issue, *The House that Jill Built*, due in summer 2022. And we welcomed some new contributors, including Mary Cooper who has been commissioned for an Ethel adaptation by BBC Radio 4, an academic working in Philadelphia, and the couple who occupy Ethel's old house in Colden! Our Ethel initiatives seem to be developing some real momentum.

Attendees at the Ethel Carnie Holdsworth meeting on line (left); and at the Dan Irving book launch (right) in person

Also this quarter we presented a book launch event in support of Clarion House, for historian Roger Smalley's new volume on **Dan Irving MP**. Our walks group continue to work on the suite of themed **Radicals walks**, and on confirming a further five sites for the second phase of the **Radicals Trail**. The **Banner Culture** publication is 90% complete but we are working over the next fortnight to resolve the final written contributions at the front end of the book. Our intention is to complete and go to print before end of January, with an estimated delivery and launch date of 14 February. 'Banner Love'...

Delivering Community Archaeology sessions and related training

Pendle Hill Time Trail:

The Time Trail was launched at a Fun Palaces event at Clitheroe Castle museum on 3rd October, with trail leaflets given out to visitors. The trail was then advertised in the lead up to October half term and trail leaflets were available for free from Clitheroe Castle Museum and The Platform Gallery in Clitheroe, as well as online.

The trail includes QR codes which take people directly to a new section on the website: <https://www.pendlehillproject.com/pendle-archaeology-trail>

We plan to use the trail again in different locations over upcoming school holidays.

Roman Road Project:

The excavation led by NAA finished on 8th October, with input from volunteers. We have now received the final report, which has also been submitted to the Lancashire HER - <https://www.pendlehillproject.com/project/archaeology>.

An article has also been submitted from NAA to *Itinera*, the journal of Roman Roads Research Association.

NAA archaeologists supervise digging of the trench

Community Archaeology:

In November we organised a session for PHLP Community Archaeology volunteers to learn more about the Roman Road research carried out by Ribble Valley Archaeology Group. The group hosted a site visit and a session in Rimington Memorial Institute to discuss in further. This session also gave Jess Wight the opportunity to meet more of the volunteers.

Jess has been working 1 day a week since the start of November. She has met up with representatives from both local archaeology groups (Pendle Archaeology Group and Ribble Valley Archaeology Group); she has researched some queries from some volunteers; she has planned upcoming events and resources and is currently planning an online talk about Scheduled Monuments.

Jess will deliver 1 public event/session each month and we hope that these will attract new participants to the project.

NAA Training:

Due to the ever-changing Covid situation we decided to postpone a training session before Christmas, and this will now be run in early February.

Threads

Supporting Volunteering and Learning opportunities across the scheme

Get into volunteering:

We delivered more sessions for the **Lancashire Police Cadets**, with cadets from the Burnley and Hyndburn and Ribble Valley units volunteering to plant up a new hedgerow in Roughlee. They did a great job, despite awful weather conditions.

We have also looked to connect Police Cadet leaders up with other landowners and volunteer groups so that they can develop joint sessions in the future and develop connections of their own.

After the success of the walk from Spring Wood to Whalley Abbey for **Carer's Link** as part of the walking festival, we repeated this walk again in October because it was oversubscribed.

Volunteering:

Pendle Hill Volunteers have continued to meet 2 or 3 times a month. From October we have moved our focus to scrub control and woodland management. We have revisited our partnership with United Utilities and continue woodland management and path maintenance on their land around Ogden Reservoir. We also ran a few volunteer sessions back on Worsaw Hill, continuing with hawthorn removal, an activity which we have been doing throughout the LP.

We continue to see new volunteers and some start coming regularly. We have also seen great commitment from a particular volunteer who started with us as part of the PEN project.

Informal outdoor learning:

During October half term, we ran three **Family Nature** events across Pendle and the Ribble Valley. These included natural art activities and a session about hedgehogs at National Trust and LCC Gawthorpe Hall. Families commented how nice it was to use Gawthorpe hall woodland and that they would return to explore more of the different habitats.

Little Saplings bi-monthly sessions have been fully booked, with an average of 10 families attending the 1.5 hour sessions this quarter. The themes have ranged from minibeasts, to Gruffalo and even a Christmas-themed session. Families have really benefited from these sessions, with one parent commenting how lovely it was for her daughter to be able to interact with other children for the first time, and that having these sessions within the outdoors, is an environment she thrives in.

A Little Saplings taster session took place in Clitheroe, in partnership with the **Home Start** charity. A similar taster session is planned for Colne Home Start group in 2022. At these sessions mums were able to find out about the Forest school ethos used at Little Saplings and experience some of the nature activities on offer.

Formal outdoor learning in schools:

Chatburn primary school and **Padiham** primary school took part in their four Treasure Trail sessions.

Lowerhouse junior school, which is a high priority PHLP and ECT school in Burnley, took part in teacher training, with Alison working with all 8 classes and their pupils, as part of a Senior Leadership Team plan to train teachers and Teaching Assistants in geography and taking the National Curriculum outside.

The outdoor learning sessions were wrapped up with a 3-hour teacher training session at the school grounds.

Teachers at Lowerhouse Primary learning outdoors

The school now plan to make the most of their outdoor site and have ordered their own Woodland Trust trees to plant, and they plan to develop their own Forest School offer in the future. One teacher commented "*The staff training provided, and the outdoor learning days with the children, have supported us as teachers to use the skills we have learnt to put into our teaching*"

Christ Church primary school continued to expand their use of Ball Grove Park in Pendle. The headteacher has really appreciated our support in embedding outdoor learning into their school plan, creating links with Pendle Borough Council, and understanding how to use the park to expand cognitive learning in their pupils.

Barrow Primary also participated in a school trip to Spring wood, with KS1 class learning about the different plants and habitats within Spring Wood. The class teacher commented "*The children thoroughly enjoyed it despite the cold and obviously learned a good deal.*" The children learnt about tree types and parts of a plant, and were able to put this knowledge into action in the woodland and by playing environmental games.

Holding the Gatherings and annual events to engage new audiences

This quarter, we have been rounding up the outcomes of multiple projects as well as researching and preparing for our final two commissions. Our delivery has been relatively unaffected by the impacts of Covid-19 in that we have managed to run face to face activity (albeit at lower capacity and with added safety measures).

The Summit (formerly young radicals)

Although The Summit came to its official end last quarter, In-Situ have remained in regular contact with the Young People involved. The project encouraged a real appetite amongst the young people for more creative activity and so we are committed to providing this. This shows the importance and success of projects like The Summit, as we are confident this project will have an important legacy within In-Situ and the lives of its participants. Ongoing work with young people from both sides of the hill have included; theatre and gallery trips to Manchester, engaging with local cultural and creative activity and an ongoing invite to our Neely established drop in youth sessions at the garage.

Additionally, the project was shortlisted for a *Pride of Nelson Award* in the category of Youth Leadership. Although we did not win, we are encouraged by this recognition.

Peat Residency

The Pendle Peat Pie has now been officially added to the menu at Hamish's Cafe and Bar in Blacko. We are thrilled that the pie has been taken on and will be available for customers to try outside of In-Situ activity. This is an important step for the legacy of the project and was a key (albeit ambitious) goal set for the project pre-covid. The feedback we have received from Hamish's is that the pie is easy to cook and answers to a growing demand from customers to provide a Vegan option.

The Pendle Peat Pie also made a successful trip to COP26 in Glasgow, where 100 pies were served to delegates. During COP26, Kerry and the pie were featured on *Morning Live*, a daily BBC One programme. The pie's trip to Glasgow was an important step to achieving national recognition of the Pie and its message and this was only furthered by the feature on BBC. With the Peat Pie now being provided by a local cafe and traveling outside of Pendle with national coverage, we are confident that a circumstance is being built in which the pie's legacy can continue beyond The Gatherings programme.

Kerry Morrison introduces Gethin to her Peat Pie on **BBC Morning Live** at the COP26 summit

Finally, the seeding event on Pendle Hill last quarter, '**Sowing in Time**,' was documented by filmmakers **People Staring**. This quarter, People Staring have developed the footage into a film commissioned by Kerry, and In-Situ to be shared with further audiences. The film was premiered at the Peat Symposium event on 17th November and we are developing plans for more opportunities to share it soon.

Stills from the film 'Sowing in Time'

Peat conference

This quarter, the two-part Peat Conference came to a successful conclusion. Hosted at The Garage, Brierfield, and online on 17th November, it was received with positive feedback from audiences and collaborators. The event explored the artistic and scientific collaborations supported by PHLP in Pendle and via the Galloway Glens Landscape Partnership in Galloway, Scotland. Both partnerships have delivered projects that utilise the impact which cross sector collaboration can have when artists team up with scientists.

We had 18 people attend in person, with 5 speakers and 6 staff supporting the event, this was a good and practical number in keeping with covid safety measures. Online, we had a total

of 33 people drop in and out for the various presentations. In total, we had an audience of 51 audience.

The feedback on the day was excellent, with anecdotal feedback from audience members including:

- "Before today I wasn't necessarily sure of how this art/science thing could work but now I totally get it."
- "There **is** a middle ground between the two (art and science). They can be mixed and that can create impact."
- "Urgent art doesn't have to mean shouty - but gently"
- "thanks for bringing so many great people together for the Deep Peat symposium. I look forward to coming to more events in the future."

Audience members were so keen to continue the conversation that In-Situ have set up an informal Google Sheet for people to exchange contact information and build their relationships. This outcome shows the event convinced people that cross sector collaboration is useful and can be put to use where they work too.

Images from The Peat Symposium

Co-ordinating Interpretation and Publicity

Work with a **local PR consultancy** – Cause UK – continues to raise the Scheme's profile nationally in print and digital media.

Media Coverage for July to December 2021 provided by Cause UK has been as follows, see also attached report:

- 19 pieces of coverage including: Pendle Radicals, Ethel Carnie Holdsworth featured in The Guardian and Morning Star; Pendle Pie at Cop 26 (Press Association and BBC TV)
- 1.88 B – online readership
- 1.41M – estimated coverage views
- 2.84K social shares
- 35.1k readership

Part two of the **Traditional Boundaries film** was produced during this quarter, with participants and trainers from the November hedge laying training course taking starring roles. The film was produced by Catapult Films and was launched via the Scheme's YouTube channel in November 2021

<https://www.youtube.com/watch?v=XB6RYQvzISA&t=gs>

Plans continue to produce a number of site-based interpretation panels, with one for the grounds of Clarion House now in production,

Staffing and Programme Management

This quarter we have welcomed our fourth and final graduate trainee to the LP Team.

Christian Murray-Moon is a recent graduate of the University of Cumbria where he had been studying Wildlife Conservation. Chris has quickly settled into his role, despite the continuing difficulties caused by Covid which have meant that after his first few weeks with the team we have all again been consigned to working from home. Chris will focus on our Interpretation work, whilst also supporting our volunteering, community engagement and access for all work. He has already joined in with the hedgelaying training and plans to support the annual hedgelaying competition in February at Downham.

The team are now working from home again, although we are continuing to mainly deliver our activity sessions outdoors, and if these need to be indoors they are held with restricted numbers of participants, under safe social distancing and room ventilation conditions. We will continue to hold team meetings outdoors and in safe conditions where we can.

As mentioned last quarter, Nichola has agreed to stay on as programme assistant, after providing maternity cover in this role. Currently this is only for 1 day a week but this will return to two days after April 1st.

The working group and the LP team have held further discussions on Programme Legacy this quarter, and we drafted a Management and Maintenance Plan for the various projects: these will be developed further over the next few months.

Now the programme is entering its final calendar year we are keeping a close eye on projects and budgets, and are still mindful of the impacts Covid continues to have on our operations: be that staff illnesses, increases in prices of supplies, or restrictions on activity we can run.

We are currently planning our activity across the programme for 2022 and beginning to develop ideas for our Final Gathering, hopefully to be held in September.

Chris, our new grad trainee (foreground) learning the skill of 'clearing the water bars' with the LP volunteer group
